Olympus Lock manufactures institutional grade cabinet locks that reflect the Company's culture of design and ingenuity. By incorporating feedback from locksmiths at airports, casinos, schools, and hospitals, Olympus engineered its products to be both durable and easy to work with, making it the preferred choice of institutional locksmiths. The Company has been around for over three decades, is still family owned and operated, and boasts industry leading ship times.

Why Olympus Lock?

- **Speed** is **KEY** - 98% of orders ship within 24-48 hours, over 350,000 locks on the floor!
- **Versatility** is **KEY** - all locks are rekeyable in 4 minutes or less!
- **Quality** is **KEY** - tested to ANSI/BHMA standards where applicable!
- **Innovation** is **KEY** - over 22 North American patents, always improving or adding features, no "me-too's"!
- **Security** is **KEY** - Complex masterkeying beyond grandmaster is available on pin tumbler locks!
- **Support** is **KEY** - factory direct assistance and submittal samples always available!
- **Order History** is **KEY** - need to add on to a job? Electronic key records are kept for all specialty orders!

Disc Tumbler or Pin Tumbler – Which to Use?

DISC TUMBLER

- Low/medium security
- Basic/limited key systems (only single level master keying)
- Less durable (shorter life cycle)
- Less expensive

PIN TUMBLER

- Higher security
- More Users (more complex key systems)
- More access control (more layers of keying - example: great grand master or inverted master keying (called "Maison Keying"))
- More durable (typically ANSI/BHMA Grade 1 or 2... greater resistance to failure, tampering, intrusion, and wear)
- More expensive

KEYING - HOW TO DETERMINE KEYING?

1. Keyed Different (KD):

All locks ordered will have a different key number; each set of keys will only work with the lock it was supplied with. When ordering Keyed Different (KD) locks from our stock you do not need to choose a key number nor will you be able to specify a key number. The only way to specify certain key numbers is through Special Order. An example of an item number for keyed different lock is OY953KD-14A. The KD in the part number denotes every lock you receive will have a different key number; **Master keys will not work on these locks.**

2. Keyed Alike (KA):

All locks in the item number will have the same key number. Each set of keys will work with ALL locks ordered with the same key number. An example of an item number for keyed different lock is OY953KA415-14A. The KA415 in the part number denotes every lock you receive will have the same key number (415). **Master keys will not work on these locks.**

3. Keyed Different, Master Keyed (KDMKD):

All locks in the item number will have a different key number. Each set of keys will only work with the lock it was supplied with. A Master Key (sold separately) will open all locks ordered. An example of an item number for keyed different lock is OY953KDMKD-14A. The KDMKD in the item number denotes every lock you receive will have a different key number, **a Master Key will open them all.** Remember, it is the lock that allows a master key to work, not the key itself.

4. Keyed Alike, Master Keyed (KAMKD) - Special Order Only:

Used when locks are required to be keyed alike within groups and a different key number is required for each group. **A Master Key (sold separately) will open all locks ordered.**

NOTE on Special Order MKD Locks:

Pin Tumbler Locks will ship with 2 free Master Keys

Disc Tumbler Locks, Master Keys are ordered separately

CASCADE DISC TUMBLER LOCK OVERVIEW

Purpose built to solve our customers' needs

- Passed ANSI/BHMA Grade 2 cycle test: 20,000 cycles including key insertion and removal
- Shipped with cylinder and body assembled via patented retainer staple. Keys are not required for assembly
- Spur washer with eyelet. When screwed into place, the spur washer prevents lock rotation and keeps fixing nut from loosening after installation
- Revolutionary cylinder + cylinder extender allows cylinders to easily be swapped between different size cam lock bodies increasing inventory and keying flexibility
- Custom keying typically ships direct from mfr in 48-72 hours
- No "keyed to schedule" up charge

CASCADE DISC TUMBLER CAM LOCKS

90° Cam Turn, Flush or Lipped/Overlay Construction

- For drawers, right-hand or left-hand doors
- Lipped/overlay construction (1-1/2" straight cam) or flush construction (1-1/8" extension, 1 1/32" offset cam)
- For overlay application, the combined thickness of front and frame cannot exceed the cylinder length listed below
- Key removable in both locked and unlocked positions
- Includes: 2 keys, 2 cams, eyelet spur washer, fixing nut, trim ring, cam screw with star washer, and retainer staple
- **Stock Keying is specified on next page**
 - KA = All Keyed Alike to key number specified, master key will not work on these locks
 - KD = All Keyed Different, various lock numbers, master key will not work on these locks
 - KDMKD = All Keyed Different and master keyed, master key will work on these locks
- Other key changes available from Olympus via Special Order

Packing: 15 locks per box. Available any quantity.

For item numbers, see table on next page

Includes pronged wood washer

PIN TUMBLER LOCKS

Olympus Lock manufactures institutional grade cabinet locks that reflect the company's culture of design and ingenuity. The company pioneered rekeyable cabinet locks and holds numerous North American patents speaking to those inventions. By incorporating feedback from locksmiths at airports, casinos, schools, and hospitals, Olympus engineered its products to be both durable and easy to work with, making it the preferred choice of institutional locksmiths.

The Company has been around for over three decades, is still family owned and operated, and boasts industry leading ship times.

Institutional Grade Cabinet Locks - Heavy duty locks for high use applications

What are the benefits of a pin tumbler versus a disc tumbler? Pin tumbler key systems provide significantly more key changes than disc tumbler systems. See the chart below for the typical number of allowable key changes under a single master key:

Wafer/disc.....	80 key changes
4 pin tumbler.....	650 key changes
5 pin tumbler.....	2,000 key changes
6 pin tumbler.....	4,000 key changes
7 pin tumbler.....	16,000 key changes

Additional Pin tumbler Features:

- 5 or 6 chambers, pin #s 0-9 (10 total steps per chamber)
- 2000+ keyed different and master keyed total key changes
- Can be grand master keyed
- More secure keyway
- For high-use commercial applications

Wide Variety of Finishes Available:

Olympus Lock offers locks in the most popular architectural finishes. Not all finishes are available on all products; see product page for standard finishes available on a specific item.
